

Your SCU Field Guide

Patterns of Human-AI Collaboration

theaikitchen.org/29

Scan or type the address for full copyable prompts and exercise instructions. Use this handout to follow the steps and record what you learn.

0 Ready to begin?

Open the **ChatGPT desktop app** and confirm you can start a **Work task**, following the emailed instructions. If stuck, ask for help or pair with a classmate.

Use your own non-sensitive interests. Share only what you choose. Use public sources and optional manual availability. Do not connect SCU email, calendars, or other accounts.

1 Try a first pass with little context

Choose **New chat > Temporary > Unpersonalized**. Give it one real detail about you. Replace the bracketed phrase:

"I'm an SCU student interested in [one interest or your major]. Find a few SCU clubs, events, or faculty that might interest me. You may browse public sources; include links. Do not use connected accounts or private files."

Check in: What seems generic? What does it still need to know about you? Keep this first pass for comparison.

2 Start with a fuzzy idea in Voice

Start **Voice** for a live conversation, rather than the microphone that only dictates text. Use headphones or speak quietly. A partner or a typed conversation works too.

"I'm going to think out loud about what I might explore at SCU. My ideas may be scattered. Help me make sense of them through your reactions, useful questions, and possible directions. I'll react and we'll refine together. Don't research or build yet."

Share a messy mix of interests, ideas, examples, constraints, and competing directions. Listen, react, correct misunderstandings, and add context. Take turns for a few minutes.

3 Read and correct your brief

"Turn our conversation into a short paragraph: my interests, goal, preferences, constraints, and open questions. Separate what I told you from your suggestions. Wait while I read and correct it."

Check in: Does this sound like you? Correct an assumption or add a missing detail. **Copy your reviewed brief before leaving Temporary chat.**

An interest, a correction, or a missing piece of context:

Build for you, then improve it

theaikitchen.org/29

Use the website for the full request. This shorter version also works as a starting point.

4 Give Work context and a goal

Start a **new normal Work task**. Paste your reviewed brief. Add available time windows only if timing matters to you, then use this request:

"Use my reviewed brief, any availability I supplied, and public sources. Do not read other local files, connect accounts, send messages, sign up, book anything, or save calendar events. You may create and inspect the HTML for this task.

Find a few SCU opportunities that fit my interests. For upcoming events, look at October 8-21, 2026. Explain why each fits using details from my brief, link its source, and suggest a next step. Consider availability only if I supplied it. Note open questions that affect fit.

Create one accessible, self-contained HTML page titled Your SCU Field Guide with visuals and source links. For timed events with details available, include a Google Calendar draft link for me to review. Save the HTML locally and show me how to open it. Do not publish."

5 While Work is working

With a partner, name the detail in your brief most likely to improve the recommendations. If the build is slow, discuss your brief or ask for a partial draft.

6 Does this fit you?

Open your page. **Does it match what you care about?** What did AI get right or wrong about you? What did it assume or miss? Which next step would you actually take?

Partner check-in: Show one recommendation. Ask, "What could I tell AI to make this a better fit?" Choose one useful change.

7 Make one specific revision

"Revise [recommendation, explanation, or page feature] because [why it does not fit me or help me]. Use this context: [correction, missing detail, or preference]. Preserve what works, update the HTML, and explain how you used my feedback. Keep using only the context I supply and public sources."

Reopen the page. Did it fit you better? Before acting on an event, check its date, time, place, and sign-up details. A calendar link opens a draft for you to review.

8 Reflect and choose a next step

Compare with the first pass. Which piece of context mattered most? What will you try next? The context that helped most, or one next step I want to take:
